

NDIS Pricing Arrangements and Price Limits

(Valid from 1st July 2021)

Note: These price limits are subject to change. The latest version of this document is available on the [NDIS website](#).
The price limits shown are the maximum that can be charged for the listed supports – you can negotiate a lower amount with your providers if you want to. Price regulation is in place to help ensure that participants receive value for money when they purchase the supports that they need.

Understanding NDIS Funding

Core Budget

Your Core budget is the most flexible, and includes four categories of support:

- **Consumables** (e.g., purchasing such as continence aids)
- **Assistance with Daily Life** (e.g., assistance with self-care activities during the day or evening)
- **Assistance with Social, Economic and Community Participation** (e.g., supports to enable you to engage in social or recreational activities)
- **Transport enables participants to access disability supports outside their home, and to achieve the goals in their plan.**

Capacity Building Budget

The Capacity Building funding is matched with the goals you have come up with in your plan. You can choose how to spend these funds to purchase any approved individual support within its category but will not be able to move funding from one category to another.

The Capacity Building support categories include:

- **Improved Life Choices** - plan management
- **Improved Daily Living Skills** - therapy aimed at building your capacity to participate e.g., Speech therapy, Occupational Therapy, Physiotherapy.
- **Finding & Keeping a Job** - employment related assessment and counselling
- **Improved Health and Well Being** - advice required due to impact of disability e.g., Dietician and exercise physiology
- **Improved Living Arrangements** - support to obtain/retain appropriate accommodation
- **Improved Learning** - assistance moving from school to further education
- **Improved Relationships** - positive behavioural support strategies to reduce behaviours of concern from a behavioural therapist
- **Increased Social and Community Participation** - Individual life skills development and training including public transport training and support, developing skills for community, social and recreational participation.
- **Support Coordination** - A fixed amount for strengthening participant's abilities to coordinate and implement supports in their plans and to participate more fully in the community.

Capital Support Budget

The Capital Support budget relates to supports such as assistive technology or modifications to your home and as such depends on quotes from suppliers. Funds within this budget can only be used for their specific purpose (e.g., rail in the bathroom or a wheelchair) and cannot be used to fund other items.

At All Disability Plan Management, we understand the responsibility of supporting a participant to best utilise their support budget and achieve their goals. We give you 24/7 access to an online dashboard and automatically send budget reports to your email each month. We regularly update you with a more detailed budget review and analysis too, helping you keep on top of plan positions.

So why not reduce your workload and let us manage the finances?
